DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-51, drawn to Document Data Processing/version management, classified in class 715, subclass 511.
 - II. Claims 52-58, drawn to File or database maintenance/coherency/version management, classified in class 707, subclass 203.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are as follows.

Invention I is directed towards content management, including updating management information, and review stages as applied to a single content item, directed to Document Data Processing, version management. Invention II is directed towards management of a first and second versions of content, said first and second version reflective of two different documents, directed to File or database maintenance/coherency/version management.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2176

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
